Snorkel trail

The snorkel trail is about 300 meters long and extends over sandy bottoms, eelgrass beds, and seaweed-covered rocks. There are thirteen buoys which lead down to the signs that are stuck in a concrete foundation on the seabed.

The signs offer exciting reading under the water for those who want to learn more about marine animals and plant life.

To snorkel you must be able to swim. The white buoys are located in shallow water while the red ones are located in deeper water. The depth can vary depending on the low and high tide, but the maximum depth is about three meters and minimum depth is approximately one meter. It is important to never snorkel alone and think about safety. If a station feels too difficult, it is better to skip it.
