Xi'an was once called Chang'an, the City of Long-lasting Peace. The city was the capital of the legendary Tang Dynasty, as well as 13 other dynasties, and the legendary ancient Silk Road started here.

The variety of folk handicrafts that greets the visitor is bewildering. With all this heritage behind it, Xi'an stands proud even in the face of its modernisation, a spectacular testament to the magnificent legacy the Chinese are so proud of.

History-lovers should definitely add Xi'an to their itineraries. From the Drum Tower in the center of town to the world-famous Terracotta Warriors which stands guard in the Mausoleum of The First Qin Emperor (the first ruler to successfully conquer the disparate feudal kingdoms to form a unified China) and the stones that make up the ancient city walls which greeted weary travelers of the far west, this city is branded with historic footprints.

DINING

Joshua Resnick/Shutterstock.com

The cuisine in Xian is greatly influenced by the flavors of Northwestern China. Home to more than 600,000 Muslims, the food here is markedly different from the food that is served in traditional Chinese restaurants.

One defining characteristic is the use of lamb in its dishes since Muslims are not allowed to eat pork which is most commonly used in Chinese cooking. Another one is the substitute of rice by flat bread and the Pita Bread soaked in Lamb Soup. Both represent the food culture of this ancient city. Of course, being an international city means other cuisines like Western, Japanese, Korean and South Asian are also represented here.

Internet Access and VPN in China

Due to the Internet policy of China, certain websites and applications are not accessible from the mainland, which includes those very commonly used in the west (Facebook, Instagram, Twitter, Google, Skype and more). Some travellers have been able to gain access to those via a VPN service (installed prior to arrival in China).

Make sure you comply with local laws and regulations when deciding on whether or not to employ a VPN, and which one to choose (if you do, only use those explicitly allowed by the Chinese government, and only use them for authorised purposes to avoid any trouble). There have been reports of foreigners in China getting their cell service cut off in response to unauthorised use of VPN being detected; restoring cell service required a trip to the local police station where contents of the device were investigated and certain apps removed.

Giving that Google is banned in China, Google Maps might not be the most accurate and reliable source of information. Some local apps such as Baidu Maps and AutoNavi tend to work better than Google Maps.
